### **SanitGrasp® Scheduled for New Chick –fil-A Restaurant Open a Public Restroom Door with your Wrist or Forearm**

Cumming, GA.; November 28, 2006 – Fulkerson, LLC is pleased to announce that the SanitGrasp has been selected for a new Chick-fil-A restaurant in Metro Atlanta. “We are proud to be associated with such a well respected company.” stated Fulkerson, LLC President Matthew Fulkerson. The patent pending SanitGrasp is a new door pull handle that allows a person to exit the restroom door with their wrist or forearm, thereby avoiding germs on the traditional restroom door pull handle. “The SanitGrasp is a very timely product. We have been searching for a solution to the traditional door pull handle and we feel the SanitGrasp satisfies that objective. We are continually searching for products that enhance our customer’s experience.” said Trent Gilley, Director of Corporate Stores Design for Chick-fil-A, Inc.

The SanitGrasp was developed to solve the following scenario in a public restroom:

1. Use the facilities – probably with an automatic flusher
2. Wash hands – probably with an automatic faucet
3. Exit restroom by touching pull handle – hands once again are contaminated

#### **The SanitGrasp is the Solution**

The “J” shaped pull handle allows patrons and employees to open the restroom exit door with their wrist or forearm. This provides many benefits:

- Increased the sanitation within an establishment
- Ease of use for those with hand disabilities
- Reduced paper towel waste and expense
- Enhanced customer experience

“The SanitGrasp offers a rare opportunity to quickly and economically improve a customer’s experience.” stated Matthew Fulkerson.

Fulkerson, LLC, based in Cumming, GA, was founded in 2005. Fulkerson, LLC may be reached at [www.fulkersonllc.com](http://www.fulkersonllc.com).
